YUPO® - Recycling and disposal

The following is intended to provide information related to the categorization of our products under the ASTM International Resin Identification Coding System ("RIC").

The **YUPO® products** listed in the below table use polypropylene resin as a main polymer material. Therefore, they can be combined with polymer products of the same category 5 ("PP") and can be recycled for the production of new plastic products.

FPG	FEBG	FRBW	FPU	YPI	FDR	QJJ	QFF	TPRA
FPS	SDI	SGM	SGP	SGS	SAR	SLR	BLRG	AISE
IDF	IZE	LBR	IHC	UAIB	AIUE	ITE		

The **YUPOTAKO®, YUPOJELLY® and YUPO® products** listed in following table consist of a printable film and a release liner or coated materials that are made of different types of resins or raw materials. Therefore, they cannot be disposed of together as single base resin and rather fall under category 7 ("Other").

WKFS	WKJ	WKO	XAD	VJFP
------	-----	-----	-----	------

Other information

All YUPO®, YUPOTAKO® and YUPOJELLY® products can be incinerated safely and are therefore a potential source of energy. As inert materials, the products can also be buried in approved landfill facilities.

The above information is provided to the best of our knowledge. Respective national and local regulations must be adhered to for each disposal method.
